

Details

Application field:

Designed for copy milling of aluminium and PVC profiles

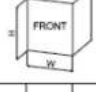

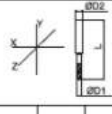

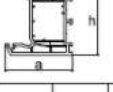

General properties:

- Copy routing unit can be used with the copying template
- Movement on recirculating ball bearings, ensure great stability and precision to the head unit, making it possible to work on every kind of aluminium and PVC profiles
- Smooth movement of units is carried out with shock-absorbers
- Scale of copy-milling operation 1:1
- Horizontal pneumatic clamping kit
- Adjustable operation depth
- 4-position rotating star-type depth adjustment device for copy-milling
- Side length stop

Option:

- Cooling system for aluminium profile cutting
